**INTERNATIONAL PRODUCT CATALOG**  
ENDMILLS • DRILLS • BURS

|             |  |
|-------------|--|
| <b>1985</b> | Incorporated in Safety Harbor, Florida   |
| <b>1986</b> | Form grinding and brazing operations are added   |
| <b>1989</b> | Company builds its first machine for manufacturing burs                                |
| <b>1989</b> | First CNC machine is purchased to help with quality and growth                         |
| <b>1991</b> | Production of endmills commences   |
| <b>1994</b> | 5 and 6 axis CNC machines purchased for volume production of burs, endmills and drills |
| <b>1995</b> | Laser marking introduced; laser inspection systems implemented                         |
| <b>1999</b> | Cell concept introduced in a new facility for greater production and quality control   |
| <b>2002</b> | Production of spiral router bits, drills, and reamers commences                        |
| <b>2003</b> | ISO 9001:2000 certification achieved; first coating machine purchased                  |
| <b>2004</b> | MAP, Mastercut's Automated Production system developed                                 |
| <b>2005</b> | CNC1st team (Customers' Needs Come 1st) implemented; second coating machine added      |
| <b>2006</b> | Production begins on high-performance endmills, drills, and miniature tooling          |
| <b>2009</b> | ISO 9001:2008 certification achieved   |
| <b>2011</b> | New surface treatments introduced  |
| <b>2013</b> | Nano coatings and Pro+ performance tools introduced                                    |
| <b>2015</b> | Mastercut celebrates 30th anniversary, and facility expansion                          |
| <b>2016</b> | Warehouse expansions in USA and Europe   |
| <b>2018</b> | ISO 9001:2015 certification achieved   |
| <b>2020</b> | Mastercut celebrates 35 years of quality and innovation                                |

### Today

Mastercut Tool Corp. celebrates more than 3 decades as a world class carbide cutting tool manufacturer. From inception to the present, our goal is providing the highest quality products and services to our customers. All products are still manufactured in Florida, using state of the art equipment, skilled craftspersons and our exclusive MAP technology.

### Our Thanks to Our Loyal Customers and Associates

Our history would not be possible without the support of all those associated with us. We thank all of our customers and associates, as well as our community, for your dedication and loyalty. We pledge to continuously improve for you!

## Superior Carbide Blend

### Mastercut's Superior Carbide Blend – A-Gr-SiV (Active Grain Sized Volume)

Our superior tungsten carbide gives you the ability to be *aggressive* when you need to be. Growth inhibitors in our submicron carbide blanks maintain the most consistent grain size available, giving you superior hardness and toughness.

# HIGH PERFORMANCE ENDMILLS

- **V4 and V5**
- **HY5**
- **F45**
- **Mold Mills**
- **TwisterMills**
- **Roughers**
- **AxMills**
- **45° HyperMills**
- **55° AlumaZips**

The customized geometries of our High Performance Endmills make these tool problem solvers for challenging milling operations.

The logo for V4, featuring the text 'V4' in a bold, red, italicized font with a yellow outline and a small gear icon to the right.The logo for V5, featuring the text 'V5' in a blue, italicized font with a yellow outline and a gear icon to the right.The logo for F45, featuring the text 'F45' in a blue, italicized font with a white outline and a gear icon to the right.The logo for HY5, featuring the text 'HY5' in a blue, italicized font with a yellow outline and a gear icon to the right.The logo for Ax Mill, featuring the text 'Ax Mill' in a black, stylized font with a gear icon to the right.

|---|----------|---|---------------|---|-----------------|
|  | 2 Flutes |  | Multi-Flute   |  | Ball End        |
|  | 3 Flutes |  | Plain Shank   |  | Double End Sq.  |
|  | 4 Flutes |  | Corner Radius |  | Double End Ball |
|  | 6 Flutes |  | Square End    |  | Weldon Flat     |

### Mastercut's Superior Carbide Blend – *A-Gr-SiV* (Active Grain Sized Volume)

Our superior tungsten carbide gives you the ability to be *aggressive* when you need to be. Growth inhibitors in our submicron carbide blanks maintain the most consistent grain size available, giving you superior hardness and toughness.

# HIGH PERFORMANCE TOOL FEATURES

## V4

- The variable 4 flute design interrupts harmonic vibrations to provide improved feeds and speeds, superior finishes and longer tool life
- Ideal for roughing to finishing operations, in both peripheral and slotting functions
- Available in our proprietary and proven PowerA (AlTiN) and the optional nanocomposite PowerNR (nACRo) for difficult-to-machine alloys

## V5

- An impressive combination of variable flutes, a thicker core and eccentrically-ground relief, adding to performance and value
- A strong, stable performer sure to provide chatter-free finishes and aggressive material removal rates
- Available in PowerA (AlTiN) and nanocomposite PowerNR (nACRo) where tool-life demands the very finest coating available
- 5 Flute design

## HLS

- High performing, broad spectrum semi-finisher/finisher
- Outstanding in stainless steels, high temp alloys, mold steels to 45 Rc
- 5 flute, 45° helix, eccentric grind provides a smooth cutting action with superb chip evacuation
- 20% + increase in productivity versus 4 fluted endmills
- Minimal tool deflection equals better part tolerance
- Stub, standard and long lengths, in square end and corner radius options
- Coated with PowerA (AlTiN)

# V4, V5 AND HY5

- 6 flute, high performance finisher providing superb finishes in stainless steels, nickel alloys, Inconels, titanium and more
- 45° degree helix provides superb chip evacuation and excellent shearing action.
- Reduced load pressures and super-stiff design promotes less chatter and the best performance in light finishing applications
- Coated with PowerA (AlTiN)

- High performance design for aggressive aluminum milling
- Incorporates a high shear, high rake geometry
- 2 and 3 flute, square end, corner radius and ball end styles
- Available in uncoated and optional PowerZ (Zirconium Nitride) coating
- Chipbreaker option where chip control or spindle horsepower is a concern

## HyperMill

- Aggressive metal removal rates in aluminum and non-ferrous materials
- 45° helix increases stiffness and improves surface finish
- 2 Flute design

## AlumaZip

- High performance 2 Flute design for high metal removal rates in aluminum and non-ferrous materials
- 55° helix combines a super-stiff profile with a rapid evacuation of chips
- High helix fluting increases contact area, thereby imparting better surface finishes

**PRO<sup>+</sup>**

Harness the power of our silicon based coatings; PowerN and PowerNR.

These coatings make our tools outstanding in high heat applications suited for hard material machining.

Our special honed flutes result in quieter running and an increase in overall tool precision.

HIGH PERFORMANCE DRILLS

# BURS

- Full Line of Shapes and Cut Types
- Special Purpose and Custom Burs Available

Mastercut's patented brazing process gives our burs the extra strength you need to push harder and run faster.

**DOUBLECUT (DC)**

**SINGLECUT (SC)**

**CHIPBREAKER (CB)**

**DIAMONDCUT (DM)**

**ALUMACUT (FM)**  
For Aluminum

**NX CUT (NX)**  
For Stainless Steel

# LEGENDS

Non-Ferrous  
**N**

Alumacuts recommended for non-ferrous materials

## Mastercut's Superior Carbide Blend – A-Gr-SiV (Active Grain Sized Volume)

Our superior tungsten carbide gives you the ability to be *aggressive* when you need to be. Growth inhibitors in our submicron carbide blanks maintain the most consistent grain size available, giving you superior hardness and toughness.

## General Bur Speed Recommendations

The following chart is a general and approximate recommendation. Variations to achieve desired results may be necessary. Long shank burs should be used at reduced speeds.

| Bur Diameter   | RPM           |
|--|---------------|
| 1/8" or 3mm Solid Carbide                                    | 45,000-50,000 |
| 3/16" or 5mm Solid Carbide                                   | 35,000-40,000 |
| 3/16" or 5mm Carbide Head Brazed to 1/8" or 3mm Steel Shank  | 30,000-35,000 |
| 1/4" or 6mm Solid Carbide                                    | 30,000-35,000 |

# SUPERIOR CARBIDE BLEND

## Mastercut's Superior Carbide Blend – A-Gr-SiV (Active Grain Sized Volume)

Our superior tungsten carbide gives you the ability to be *aggressive* when you need to be. Growth inhibitors in our submicron carbide blanks maintain the most consistent grain size available, giving you superior hardness and toughness.

# MASTERCUT PREMIER COATINGS

---

- Speed and Feed increases from 30 to 200 percent
- Tool life is increased up to 10 times
- Reduces friction, spindle torque and vibration, providing a better finish
- Isolates the tool from the part, avoids edge buildup and tool cratering
- Reduces or eliminates coolant requirements
- Repeatable, stable performance between batches

# MASTERCUT TOOL COATING OPTIONS

## Our Available Coatings

### **PowerT (Titanium Nitride, TiN) (append -2)\***

Color: Gold  
Vickers Hardness: Approximately 2,300 Vickers  
General purpose, entry level over uncoated carbide

### **PowerC (Titanium Carbon Nitride, TiCN) (append -3)\***

Color: Ranges from slight violet to brown-gray  
Vickers Hardness: Approximately 3,000 Vickers  
Used on ferrous, non-ferrous and non-magnetic stainless steel  
Good abrasion resistance, low heat resistance, for applications requiring low RPMs and high thrust

### **PowerA (Aluminum Titanium Nitride, AlTiN) (append -1)\***

Color: Dark Gray  
Vickers Hardness: Approximately 3,600 Vickers  
Nickel Alloys, Stainless Steel, Hardened Steels, Tool Steels, Cast Iron  
An excellent broad spectrum grade. May be run in dry or minimum quantity lubrication applications, where heat can be a problem. Also handles light chip loads very well

### **PowerZ (Zirconium Nitride, ZrN) (append -4)\***

Color: Dull Gold  
Vickers Hardness: Approximately 2,800 Vickers  
Outstanding on aluminum, including high silica aluminum. Can also be used on cast iron, stainless steels, titanium

### **PowerN (nACo) nano-composite (nc-AlTiN)/(a-Si<sup>3</sup>N<sup>4</sup>) (append -5)\***

Color: Varying hues of blue and red  
Vickers Hardness: approximately 4,500 Vickers  
Outstanding performance in superalloys, hard material machining, and high heat applications.

### **PowerNR (nACRo) nano-composite (nc-AlCrN/a-Si<sup>3</sup>N<sup>4</sup>)(append -8)\***

Color: gray  
Vickers Hardness: 4,000 Vickers  
Outstanding in high heat applications, better resistance to shock and chipping than nACo, for tough, aggressive cutting applications.

### **PowerDLC (Diamond Like Carbon)(append -6)\***

Color: variable gray to black  
Vickers Hardness: approximately 4,000 Vickers  
Non-ferrous metals, high silicone aluminum, copper, plastic, graphite, fiberglass or reinforced plastics  
Can be applied to any carbide substrate

### **PowerRD (Real Diamond)(append -7)\***

Color: variable gray to black  
Vickers Hardness: approximately 8,000 Vickers  
Non-ferrous, metals, aluminum, graphite, green ceramics, and composites  
Requires 6% cobalt carbide for application

\* **append -#** indicates that this coating is applied to uncoated tool part number

# Mastercut Tool Corp.

## Quality Processes

**YOUR PREMIER SOURCE FOR THE HIGHEST QUALITY CUTTING TOOLS FOR MORE THAN A QUARTER CENTURY!**

From 1985 to the present, the values and ideals of Mastercut Tool Corp. remain steady. We will work relentlessly to continuously improve and provide you with excellence. We are known worldwide for many unique high performance tools engineered in our Florida facilities. Our AxMill, V4, V5, and F45 are just a few products that make Mastercut Tool Corp. your choice for increasing production and reducing costs.

### ISO 9001:2015

In 2003, Mastercut Tool Corp. successfully achieved registration under ISO 9001:2000 and has maintained our quality system to our current ISO 9001:2015 certification. We maintain these strict standards and Lean/Six Sigma practices to further guarantee that every tool you buy from Mastercut Tool Corp. is of the highest quality.

### The "MAP" to Your Success!

Our continuous improvement has led us to a process that gives you unmatched, consistent quality. That process is our unique MAP Technology! Mastercut Automated Production is our exclusive method of standardization and quality repeatability. The MAP combines technology, skill, and rigid processes to provide you with the most precise products that money can buy, batch to batch and year to year.

Our MAP...your map to success!

### CNC 1st Team

Customers' Needs Come First! This is what truly matters to us. To ensure you the fastest possible service, we have assembled simulation, engineering, production scheduling, customer service, and inventory personnel into one unit. They collaborate on any and all special requests from you, the moment your request is received. They are dedicated and qualified to assist you with solutions, fast!

### Mastercut's Superior Carbide Blend – A-Gr-SiV (Active Grain Sized Volume)

Our superior tungsten carbide gives you the ability to be aggressive when you need to be. Growth inhibitors in our submicron carbide blanks maintain the most consistent grain size available, giving you superior hardness AND toughness.

### SUCCESS

At Mastercut Tool, we take great pride in our high quality control standards and in the accomplishments of your customers using our superior quality tools. Therefore, our bottom line is:

**Your customers' success with our products is the measure of our success!**

# MASTERCUT TROUBLESHOOTING GUIDES

| Solid Carbide Endmills |                                   |  |
|------------------------|-----------------------------------|--|
| Challenge              | Cause                             | Corrective Action  |
| Chattering             | Incorrect Feed Rate               | Reduce feed rate 10%   |
|                        | Incorrect Speed                   | Check recommendations, adjust accordingly                              |
|                        | Low Tool Holder Rigidity          | Replace tool holder with more rigid tool holder                        |
|                        | Low Machine Tool Spindle Rigidity | Utilize machine with larger spindle                                    |
|                        | Relief Angle Too Steep            | Switch to tool with less relief or regrind tool to reduce angle        |
|                        | Low Work Piece Rigidity           | Tighten or improve work piece holding method                           |
|                        | Depth of Cut                      | Reduce depth of cut  |
|                        | Incorrect Tool Cut Length         | Use shorter flute length and/or place tool shank deeper in tool holder |
|                        | Bad Collet                        | Replace collet   |
|                        | Tool Too Sharp                    | Reduce feed rate 10% for initial cut to break in tool                  |
| Breakage               | Incorrect Feed Rate               | Reduce feed rate   |
|                        | Incorrect Depth of Cut            | Reduce depth of cut  |
|                        | Incorrect Tool Cut Length         | Use shorter flute length - Place tool shank deeper in tool holder      |
|                        | Incorrect Tool Overall Length     | Use shorter tool or place tool shank deeper in tool holder             |
|                        | Tool Wear                         | Replace tool or sharpen tool at earlier stage                          |
|                        | Chip Impaction                    | Increase coolant flow  |
| Chipping               | Incorrect Feed Rate               | Reduce feed rate   |
|                        | Improper Tool Break In            | Reduce feed rate 10% for initial cut to break in tool                  |
|                        | Incorrect Feed Direction          | Change cut path to climb milling                                       |
|                        | Chatter                           | See recommendations for correcting chatter                             |
|                        | Low Tool Holder Rigidity          | Replace tool holder with higher rigidity tool holder                   |
|                        | Low Machine Tool Spindle Rigidity | Utilize machine with larger spindle                                    |
|                        | Low Work Piece Rigidity           | Tighten or improve work piece holding method                           |
|                        | Tool Too Sharp                    | Reduce feed rate 10% for initial cut to break in tool                  |
|                        | Loose Tool Holder                 | Clean and tighten tool holder  |
|                        | Loose End Mill                    | Tighten tool holder  |
|                        | Incorrect Speed                   | Check recommendations and adjust accordingly                           |
| Lack of Hone           | Hone cutting edge                 |  |
| Wear                   | Incorrect Speed                   | Check recommendations and adjust accordingly                           |
|                        | Incorrect Feed Rate               | Reduce or increase feed rate   |
|                        | Incorrect Feed Direction          | Change cut path to climb milling                                       |
|                        | Hard Material                     | Use tool designed for hard material - Use coated tools                 |
|                        | Chip Impaction                    | Increase coolant volume - Increase coolant pressure                    |
|                        | Poor Coolant Condition            | Replace coolant or correct mix ratio                                   |
|                        | Short Tool Life                   | Use tool designed for work piece material - Use coated tools           |
|                        | Incorrect Tool Geometry           | Utilize tool recommended for work piece material                       |
| Chip Impaction         | Incorrect Feed Rate               | Reduce feed rate   |
|                        | Incorrect Speed                   | Check recommendations and adjust accordingly                           |
|                        | Incorrect Tool Geometry           | Utilize tool recommended for work piece material                       |
|                        | Insufficient Coolant              | Increase coolant volume - Increase coolant pressure                    |

# Terms and Conditions

## **To Order**

Faxed or e-mailed orders are required. Please specify quantity and EDP/Part numbers.

Minimum Orders: \$50 for standard items, \$200 for special orders. Orders below \$50 are subject to a \$7.50 handling fee.

## **Standard Payment Terms**

Overseas customers: Prepaid.

US customers: Net 30 Days, pending credit approval, past due after 30 days from billing date.

## **Freight**

International orders are shipped under the Incoterm ExWorks. Mastercut Tool Corp. offers daily service with FedEx and UPS. Shipments made Pre-Pay & Add on Mastercut's FedEx or UPS accounts are subject to a \$2.50 handling fee for domestic shipments and a \$25.00 handling fee for international shipments. We are also happy to utilize any freight carrier when shipping on a collect or third-party account, with no additional handling fee.

## **Return Policy**

We do not accept returns on items which we do not maintain in stock. Returns are subject to a 25% re-stocking fee. No returns on specials. No returns will be accepted beyond 2 months from date of shipment.

## **Additional Offerings**

Special Tooling for your requirements.

When you need a non-standard tool for a specific job, give us a call. Requirements for special tooling or modifications of existing standard items will be given prompt, expert attention.
